

Ride Map Add-on Feature for Apps

Ride Map feature allows a Driver to notify the Riders that he has reached the location from where he is supposed to pick them up. Upon clicking on "**Notify Booker**", the Rider will get exact location of the Driver on the Ride Sharing App's Map. And they can then walk to the Driver and get the Ride started.

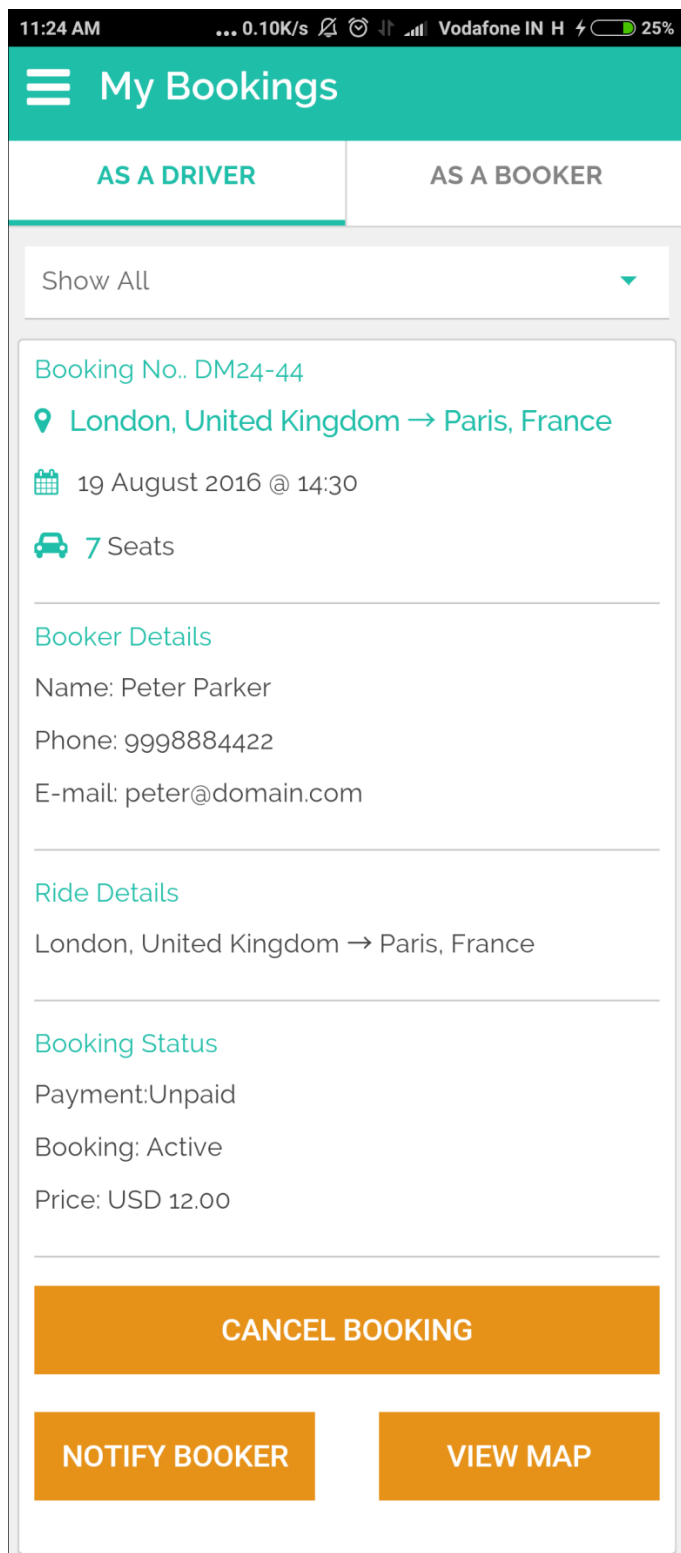

The Rider's location on map is auto updated and driver will be able to see rider's updated location on map. This feature is dynamic, so the Driver will see the Rider moving dynamically towards him on the map.

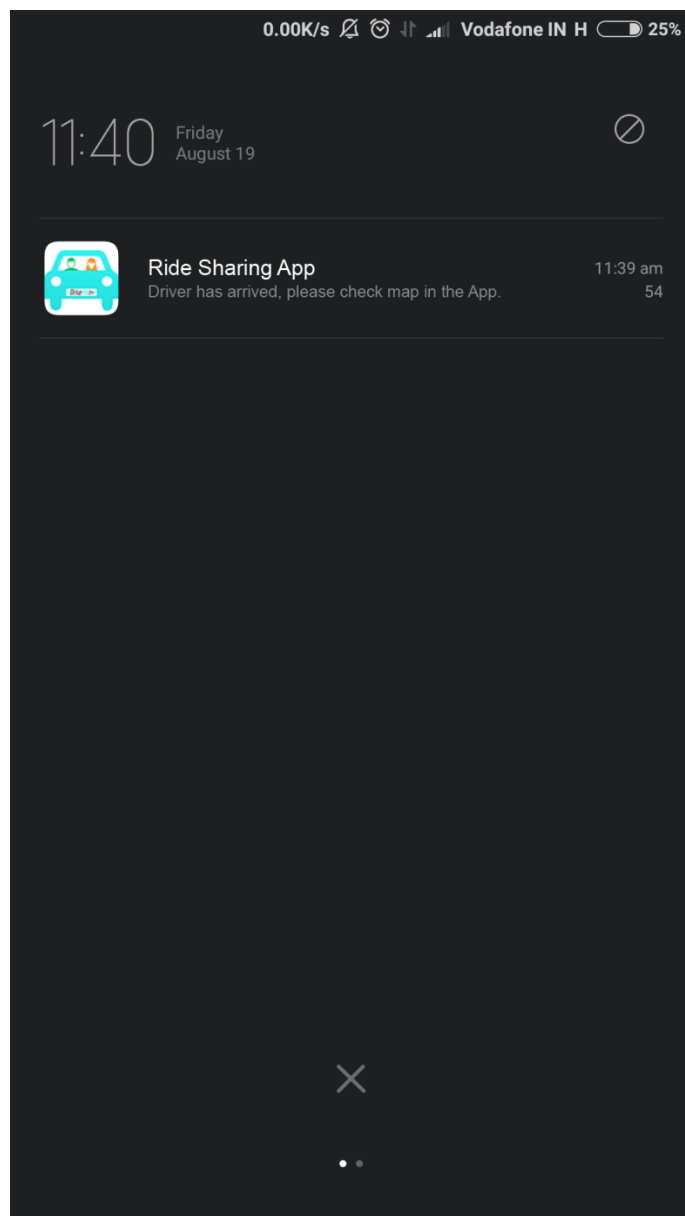

a. On "My Bookings" Page in Driver's App, the upcoming Ride's detail will be listed. The detail page will have list of rider's they are supposed to be Picked up in the ride.

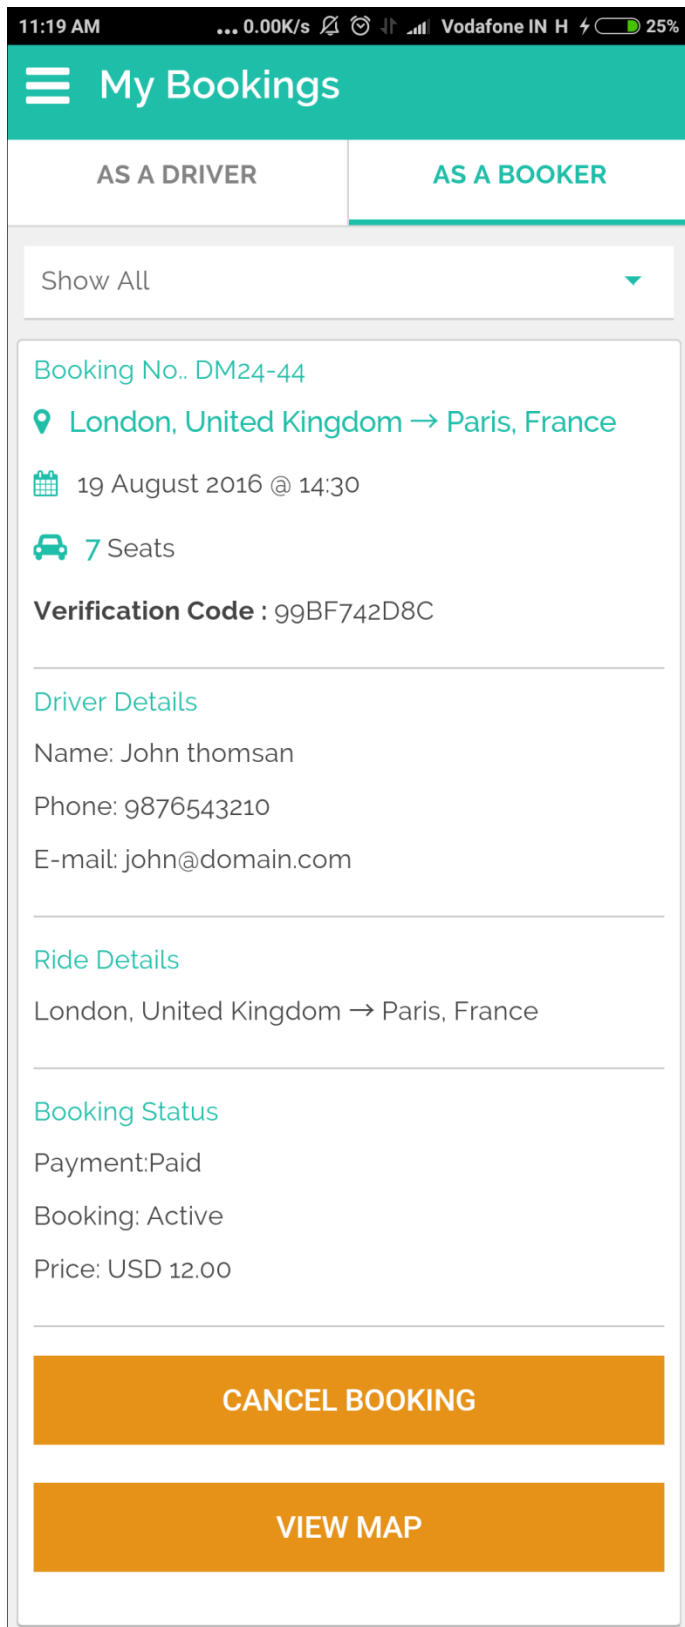

As soon as the driver has reached to Pick Up location of the Rider, he will tap on "Notify Booker" button to notify passenger that he has arrived and is waiting for him to arrive.

b. The notification is immediately sent to the **Rider**. The **Rider** will receive the notification on his mobile. This way each Rider will receive a notification message when the Driver arrives at his location and Notifies him.

c. Each Rider will have "View Map" button his Ride Detail Page. Screen having Driver's current location on Map will be visible when clicked on "View Map" button.

d. Screen with Map having Driver's current location will be displayed as below.

Here, on the map Peter Parker is the **Rider** while the other icon is of **Driver**.
